

Home care allows you to continue to stay at home where you want to be, and to be independent even in the face of major health problems. We are dedicated to providing comprehensive patient centered care that is focused on each patient's individual and unique health needs. We want to be *your* provider of choice for these services.

Our mission is to provide caring, dedicated staff to promote comfort and relief of any suffering to that our patients may achieve the quality of life they deserve. Our patients needs and goals are our top priorities at St. Luke. Our vision is to provide you with comprehensive, holistic palliative care concentrated and created for each individual.

Please call us if you would like to volunteer with our Hospice program. Needs are great and varied. You can mail caring cards, make a meal, or sit with a person who could use a little help. It's all important to our patients. Call Volunteer Coordinator Cecile Ward, toll free, 1-866-428-1142.
