

Healing Wounds is Our Specialty

Serious health consequences can affect your quality of life if you have non-healing wounds. Our team will determine the underlying cause of your non-healing wound and customize treatment just for you. Our treatment plans complement the care of your doctor and we are known throughout the country specializing in wounds that are difficult to heal.

If you have any of following conditions...

- Slow-to-heal or non-healing wounds
- Diabetic foot or leg ulcers or wounds
- Surgical wounds that have opened
- Pressure Ulcers or Arterial Ulcers
- Non-healing skin grafts or surgical flaps
- Bone infection, also called osteomyelitis
